03 • EXECUTIVE LEADERSHIP

Management & Field Leadership

Nazir Ahmad Mir

Sole Proprietor & Managing Contractor

Nazir Ahmad Mir brings over **18 years of direct construction leadership** to Jammu & Kashmir's infrastructure sector. Under his guidance, the firm has delivered drinking water schemes, residential and institutional civil works, and rural electrification projects.

Mr. Mir manages projects with direct, on-site presence. By regularly inspecting active workfronts, coordinating closely with department engineers, and solving terrain hurdles on the ground, he ensures projects move forward safely, accurately, and on schedule.

Daily Work Execution

04 • ORGANIZATIONAL STRUCTURE

Project Management & Site Teams

Our work on site is managed by qualified resident engineers and supervisors, with direct oversight from the proprietor.

Site Responsibilities

A designated site engineer coordinates day-to-day operations and interfaces directly with department engineers.

Proprietor Oversight

Nazir Ahmad Mir regularly visits active sites to review progress, resolve issues, and ensure standards.

Quality Checks

Materials, concrete pours, and pipe alignments are checked before moving to subsequent work phases.

Daily Site Logs

Work progress, site conditions, and material arrivals are logged daily for transparent client coordination.

05 • CORE CAPABILITIES

Core Construction & Engineering Services

Registered as an A Class Contractor in Jammu & Kashmir, M/S Nazir Ahmad Mir provides construction services across three main engineering fields. With over **18 years of field experience**, our team brings practical knowledge of local terrain, quality materials, and departmental requirements.

We manage contracts from site handover through to physical execution, testing, and final departmental measurement.

Civil & Structural Works

Construction of institutional buildings, schools, residential structures, mass concrete foundations, boundary walls, and site development works.

Buildings

Foundations

Retaining Walls

Water Supply & PHE

HDPE and GI pipeline laying, water storage tanks, sedimentation tanks, and village water supply schemes under Jal Shakti / Jal Jeevan Mission.

HDPE Pipes

Storage Tanks

Valves

Electrical Works

11kV and 33kV overhead line erection, distribution transformer installation, sub-station civil works, and municipal street lighting.

06 • CIVIL & STRUCTURAL

Civil & Structural Works Division

We construct institutional buildings, public facilities, and civil retaining infrastructure built to Indian Standards (IS) and J&K PWD specifications. Our civil works prioritize structural safety, durable materials, and reliable on-site supervision.

Building & Structural Works

- RCC Framed Construction
- Institutional & School Buildings
- Commercial Building Foundations
- Load-Bearing Masonry Works

Foundation & Retaining

- Mass Concrete Foundations
- Retaining Walls & Slope Protection
- Stormwater Drainage Channels
- PHE Pipeline Trenching & Bedding

Culverts & Drainage

- RCC Box Culvert Construction
- Bridge Approach & Abutment Works
- Paved Access Roads & Pathways
- Site Safety & Protection Barriers

Engineering Standards & Quality

All civil works adhere strictly to IS 456 (Concrete), IS 800 (Steel), and J&K PWD specifications, verified by regular third-party laboratory testing.

IS

STANDARDS

07 • ELECTRICAL INFRASTRUCTURE

Electrical Engineering & Power Distribution

We execute turnkey electrical distribution works for power utilities and municipal authorities across Kashmir—covering HT/LT line erection, transformer installation, sub-stations, and modern street illumination.

HT/LT Networks

11kV & 33kV lines, pole erection, and underground armored cabling.

Transformer Systems

Distribution transformers (25–200kVA), plinth mounting, and earthing pits.

Street Lighting

Energy-saving LED highway fixtures, automated timer panels, and solar lighting.

Electrical Scope & Capabilities

- 11kV & 33kV Power Lines
- Distribution Transformer Installation & Testing
- LT Distribution Networks & Pole Erection
- Municipal & Highway LED Street Lighting

08 · WATER & PUBLIC HEALTH INFRASTRUCTURE

Water Supply & Pipeline Works

Drinking water infrastructure is one of our primary contracting areas. Registered as an A Class contractor with the **Jal Shakti (PHE) Department Kashmir**, we execute rural and municipal water supply schemes under the **Jal Jeevan Mission (JJM)**—delivering reliable pipeline networks across local communities.

Pipeline Laying

Trenching and laying HDPE (PE-100) and GI pipes across valley terrains, with butt-fusion jointing and pressure testing before trench backfilling.

HDPE Pipes

GI Pipelines

Trenching

Storage Tanks & Reservoirs

Construction of reinforced concrete ground storage reservoirs (GSR) and overhead tanks designed to standard water-retaining specifications.

RCC Tanks

Ground Reservoirs

IS 3370

Filtration & Treatment Units

Execution of slow and rapid sand filtration units, sedimentation tanks, and chlorination systems for community drinking water supply.

Sand Filters

Settling Basins

Treatment

Valves & Distribution

Installation of sluice valves, air-release valves, flow meter chambers, and connecting distribution lines to village settlements.

Sluice Valves

Air Valves

Testing

2D & 3D Drafting Support

We provide practical drawing and drafting support to assist site execution and project approvals.

2D Design

Preparation of 2D site layout plans, building floor plans, elevation drawings, cross-sections, and basic bar bending schedules to guide construction teams on site.

Site Layouts

Floor Plans

Cross-Sections

3D Design

Basic 3D exterior building views and perspective drawings to help clients and site teams visualize structures clearly before construction begins.

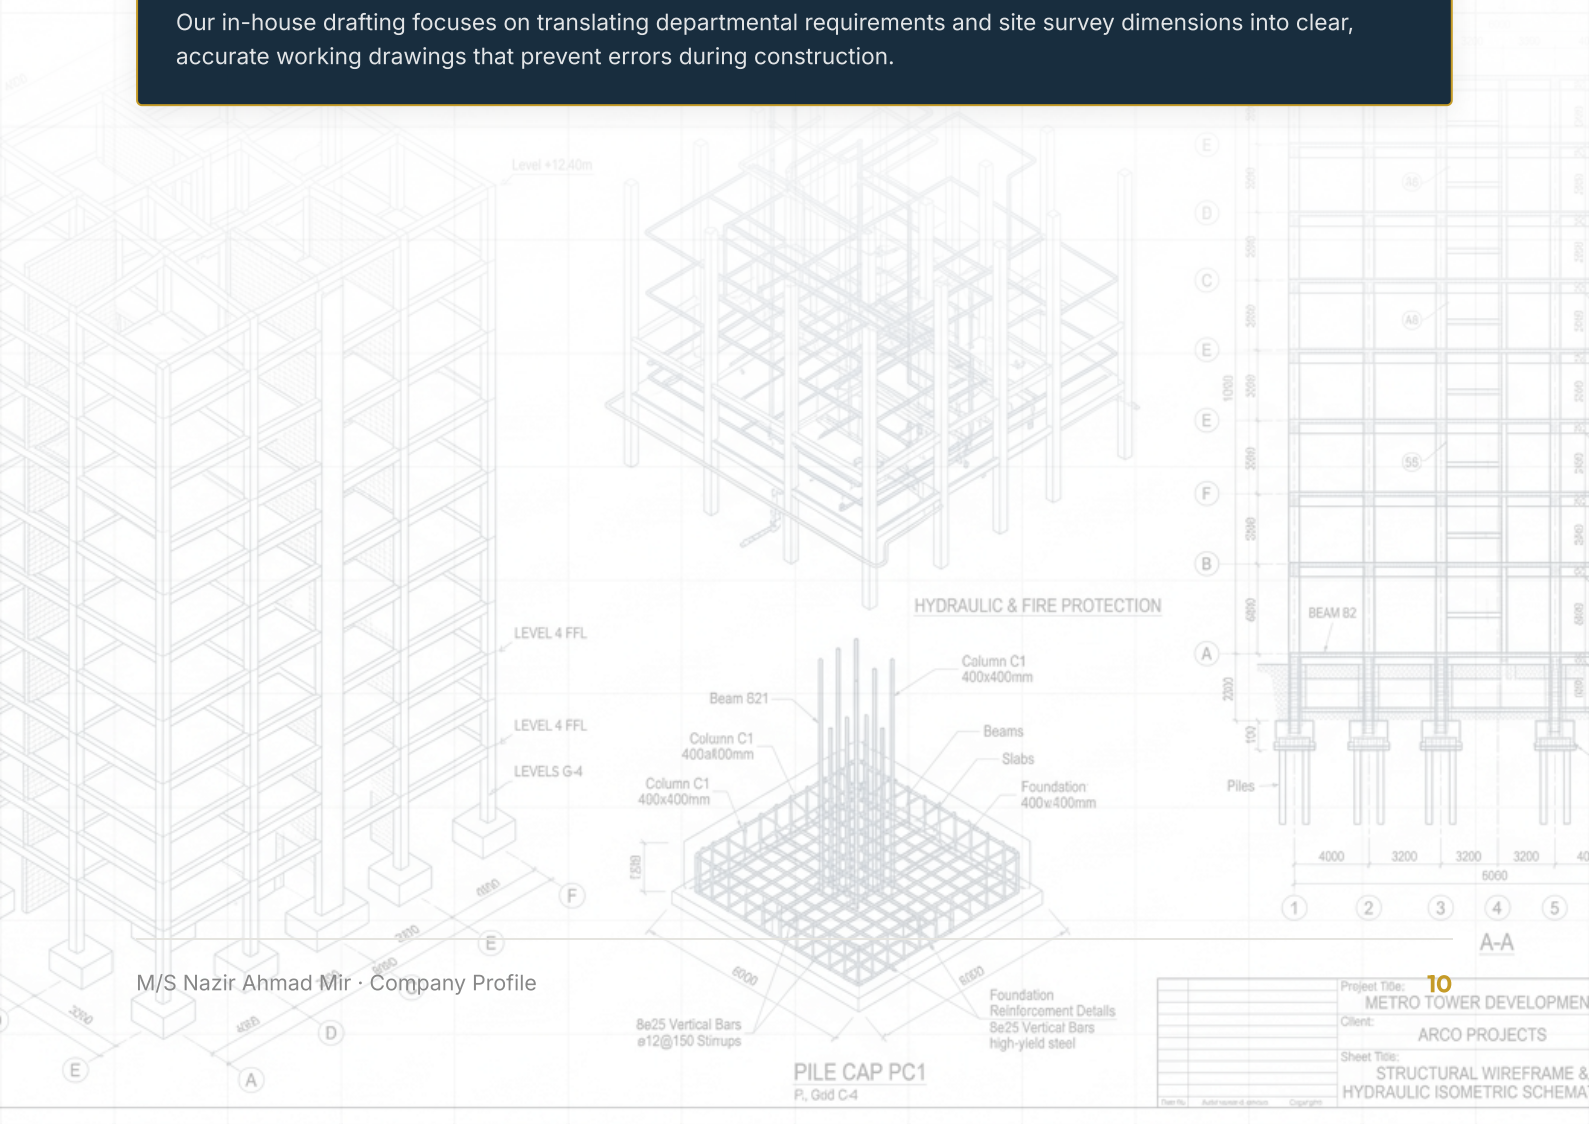

3D Perspectives

Visual Models

Practical On-Site Drafting

Our in-house drafting focuses on translating departmental requirements and site survey dimensions into clear, accurate working drawings that prevent errors during construction.

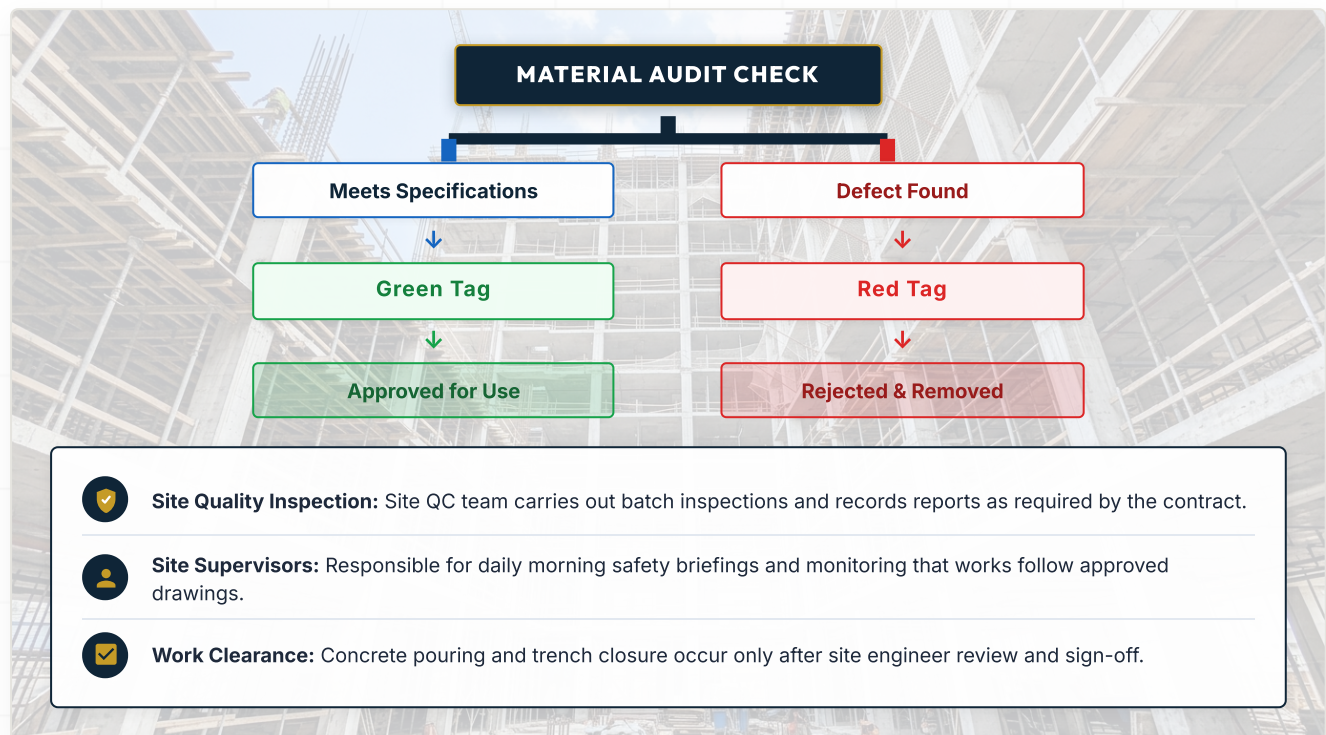

10 • SAFETY & QUALITY POLICY

SAFETY & QUALITY ON SITE

At M/S Nazir Ahmad Mir, quality construction and worker safety are fundamental on every site. We inspect incoming materials, enforce basic site safety rules, and ensure work meets departmental specifications.

- ▶ **Material Inspection:** Cement (OPC/PPC) and steel (Fe-500D) are procured from approved reputable brands and checked before site entry.
- ▶ **Aggregate Checks:** Coarse aggregates and sand undergo regular silt and cleanliness checks before being used in concrete mixes.
- ▶ **Pipeline Verification:** HDPE (PE-100) and GI pipes are inspected for wall thickness and quality before deployment in trenches.
- ▶ **Stage-Wise Supervision:** Site supervisors inspect formwork, rebar placement, and joints before concrete pouring or trench backfilling.
- ▶ **Worker Safety:** Mandatory personal protective equipment (helmets, safety boots, high-visibility vests) on active work sites.
- ▶ **Safe Material Staging:** Secure material storage at our Budgam yard to ensure uninterrupted supply during weather disruptions.

11 • PROJECT PORTFOLIO

Project Gallery: Works Across J&K

A selection of public works completed across Jammu & Kashmir, including bridges, pipeline alignments, power lines, and retaining structures.

PW(R&B) • BRIDGES

River Crossing & Pier Foundation Works

Deep foundations, RCC piers, and bridge approach civil execution across valley streams.

JAL SHAKTI • WATER SUPPLY

Pipeline Route Survey & Layout

Field surveying, alignment marking, and pipeline profile planning for drinking water schemes.

KPDCL • POWER DISTRIBUTION

Line Erection & Transformer Installation

Tubular pole erection, conductor stringing, and distribution transformer installations.

IRRIGATION & FLOOD CONTROL

Mass Concrete Retaining & Protection

Heavy concrete retaining walls built for slope stabilization and torrent protection.
